

Invited Speaker

Ick Chan Kwon

*Head of Biomedical Research Center,
Korea Institute of Science and
Technology, Korea*

Ick Chan Kwon is currently Head of the Biomedical Research Center at the Korea Institute of Science and Technology (KIST), Korea. He received his B.S. and M.S. from the Department of Textile Engineering at Seoul National University, Korea in 1982 and 1984, respectively and his Ph.D. in Pharmaceutics and Pharmaceutical Chemistry from the University of Utah, USA under the guidance of Professor Sung Wan Kim in 1993. After his postdoctoral training at the Center for Controlled Chemical Delivery of the University of Utah, he joined KIST in 1994. He is currently President of the Korean Society of Molecular Imaging (2008-2010). He also serves as Editor Asia of the *Journal of Controlled Release* (Elsevier), Asian Editor of the *Journal of Biomedical Nanotechnology* (American Scientific Publisher) and a member of editorial boards such as the *Journal of Biomedical Engineering Research* and the *Journal of Biomaterials Science, Polymer Edition*. His main research interest is targeted drug delivery with polymeric nanoparticles and he is now expanding his focus to the development of smart nano-probes for theragnostic imaging. He is a project leader of "Real-Time Molecular Imaging" supported by the Ministry of Science and Technology of Korea. He has published 140 peer-reviewed articles, 11 book chapters and 8 review articles.
